

Advantages (Modular):

A well-proven and innovative construction system that can provide shelter for people and equipment in a wide range of applications and locations almost instantly!

Buildings are fully re-locatable and can be moved from one site to another with ease, providing buildings “where you want them when you need them!”

Products are market specific and designed based on the needs of customers – and hence fit perfectly with the guidelines and specifications of clients

Modular Building Systems deliver higher quality, safe, non-combustible, strong, energy efficient and cost effective buildings much faster than any other construction system.

Buildings are suitable for retail buildings, housing and various types of accommodations, schools, health centers, army barracks and field buildings, vacation homes and resort housing, etc., etc.

Streamlined ‘production-line’ manufacturing process using CNC machines and strict ISO Standards quality control to speedily produce accurate and high quality structures under safe working environments.
